

Recording artist Natalie Grant graced us with a dynamic performance.

**Jordan Katz, co-writer of "Valiant":**

It's very nice, and I didn't know much about it until this awards show, but it's very nice to get to know about it and I think it's a very nice evening and a very nice thing that Dr. Baehr is trying to organize.

**Actress Jenn Gotzon, a volunteer greeter for the MOVIEGUIDE® Awards:**

I had such a great time here at MOVIEGUIDE®, being able to interact with all the guests and see the celebration of people coming together in faith and values. It's just an amazing awards show.

**Bryan Todd, recording artist, performer at Movieguide® awards:**

Oh, it's great! I'm a new father of a 17-month-old, so it's just nice to have something out there that kind of says, Hey this movie is, you know, there might be some questionable material in it, or whatever. Just to know that going in, you know. You may still choose to go to that movie, and that's fine, but it's just nice to have some kind of accountability.

**Dave Johnson, producer SUE THOMAS: F.B. EYE, co-winner of the Ware Foundation Libertas Prize for Promoting Positive American Values:**

We know and love MOVIEGUIDE®. They give us things every year, and we always like people who give us stuff. I've seen the MOVIEGUIDE awards grow in stature, influence and scope within the last few years. It's gotten to a tipping point where most movie studio people want to attend. Many moviemakers know their movies will never be nominated for an Academy Award because they're not perceived to be cool or hip enough among the club of Hollywood insiders. But, they know that MOVIEGUIDE recognizes and honors the movies that most Americans respond to. It's increasingly being realized that the Oscars are way off to one side but MOVIEGUIDE is mainstream.

Ted Baehr's facts and figures are increasingly hard to ignore since he makes his report each year. While the Hollywood left tries to twist the significance of the data, they've never been able to dispute the data. †
